

The Atlantis Abutment in Zirconia brings ceramic technology to the next level.

Precision

Patented Atlantis expert system-based design process assures that the abutment is delivered ready to seat without the need for additional modifications.

Strength & Reliability

Proprietary integrated manufacturing process provides the strength and reliability you demand.

Simplicity

Compatibility with multiple implant systems assures only one restorative protocol required.

Esthetics

All ceramic design eliminates metal interfaces for an exceptional esthetic result.

Ready to seat abutment aligns precisely to healed tissue

Atlantis Abutment in Zirconia provides a superior esthetic result
